General description

The FLIR A310 pt Pan&Tilt offers an affordable solution for anyone who needs to solve problems that need built in "smartness" such as analysis and alarm functionality. The FLIR A310 pt Pan&Tilt has all the necessary features and functions to build distributed single- or multi-camera solutions to cover large areas to monitor such as in Coal pile monitoring, Sub-station monitoring utilizing standard Ethernet hardware and software protocols.

The A310 pt-Series precision pan/tilt mechanism gives operators accurate pointing control while providing fully programmable scan patterns, radar slew-to-cue, and slew-to-alarm functionality. Multi-sensor configurations also include a day/night 36x zoom color CCD camera on the same pan/tilt package.

Key features:

- Built-in extensive analysis functionality.
- Extensive alarm functionality, as a function of analysis and more.
- H.264, MPEG-4 and MJPEG streaming.
- Built-in web server.
- 100 Mbps Ethernet (100 m cable, wirele ss, fiber, etc.).
- Composite video output.
- Precise Pan/Tilt mechanism.
- Daylight camera.
- IP66
- IP control, the PT-Series can be integrated in any existing TCP/IP network and controlled over a PC.
- Serial control interface, use Pelco D or Bosch commands over RS-232, RS-422 or RS-485 to a remotely control the A310 pt.
- Multi-camera software: FLIR Sensors Manager allows users to manage and control a PT-Series camera in a TCP/IP network.
